Application number 09/886,221

Filing date 06/21/2001

Applicant Hanna Albert Awad

Title Sink electricity, generation, computers on three digit (0,1,2), operation of machinery

An abstract :

Sink electricity is the decrease of motion of electrons and its transmission.

A generator of sink electricity will turn the stator and take current from the free moving rotor.

A computer on three digit arithmetics (0,1,2) will use normal and sink electricity both ways as described in the schematic drawing.

Operation of machinery on two lines (normal and sink electricity), voltage and current doubled. Higher torque and RPM. And operation on three lines (normal, neutral and sink electricity) or (three sink electricity lines).
